

## CISSP Practice Questions #3 - ALL CISSP Domains 250Q - 2019

Course Code :

Product Category : All IT Certification, Cyber Security, VOD

Access Duration : 365 Days

Price : US\$15

Learning Credits : NA

### Product Summary

CISSP certification practice questions #3: 2 FULL 125 question CISSP tests, 250 CISSP questions total - 2019 version.

### Product Description

Certified Information Systems Security Professional **CISSP certification practice exam** is **2 full 125 practice question test** just like the real CISSP certification exam and the **CISSP domain questions** are **weighted at the same percentage**.

#### Included in this course:

- 2 full 125 question CISSP practice tests, with the same percent of weighted questions, from all the CISSP domains as you will see on the real exam.
- 10 bonus questions from my "CISSP certification #4: 250 practice questions (2x 125Q) '19" course.

These tests are based on what the CISSP exam will test on until the next **CISSP curriculum update in 2021**.

In our tests you will get an explanation as to why the right answer is the right answer, in the review after you finish each test.

#### The CISSP exam has 8 Domains, that make up the CISSP CBK (Common Bodies of Knowledge):

1. Security and Risk Management – 16%
2. Asset Security – 10%
3. Security Engineering – 12%
4. Communications and Network Security – 12%
5. Identity and Access Management (IAM)– 13%
6. Security Assessment and Testing – 11%

7. Security Operations – 16%

8. Software Development Security – 10%

This does not mean 10% of the questions on the CISSP exam are from Domain 8, this means 10% of the weighted questions are from Domain 8.

All questions will be **multiple choice** with either a **single** or **multiple** answers.

The questions in the **exam emulation series** and the **domain series** are based on the same unique **1,000 questions**.

At the end of the CISSP certification practice exam you can see the **total percentage score** and a **weighted percentage score** for each of the **8 CISSP domains**. You can review each question and sort by CISSP knowledge area, correct answers, wrong answers, skipped questions and questions marked for review.

To pass the CISSP certification exam you need the knowledge to pass (obviously), but that is not enough.

Understand and answer every question from a **Manager** or a **Risk Advisers** point of view, NOT from an executive or as a techie. Most hands-on techies that fail the CISSP certification exam do so because they answer from a point of being reactive, not being proactive.

Spot the **keywords** (non-repudiation, public key,) and the **indicators** (Not, Most, First).

You have **3 hours** to answer the **100-150** questions. Remember on the real CISSP exam, you can't mark questions for review.

**Eliminate wrong answers:** If they ask about encryption and the answer are DES, AES, Sprinkler systems, the OSI model, you can safely eliminate Sprinkler and OSI, you are now at a 50% chance of a right answer.

Do multiple CISSP certification practice tests like this one, do the **full 3 hours** and **125 questions** to see how you handle it, this is as much mental stamina and reading the questions right, and answering from an **IT Security managers** point of view, as it is the actual knowledge.

Many students do **3,000 - 5,000** CISSP certification practice questions.

You can take this CISSP certification practice test as many times as you want, the questions and the answer order is randomized. We would suggest **80%+ of right answers** consistently on all CISSP domains using multiple practice tests before booking the exam.

Take this and other CISSP certification practice tests, find your weak areas, study those and then take it again, rinse/repeat as much as needed.

On this CISSP certification practice test you can see your progress, it **saves the previous attempts**.

**Who this course is for?**

- People wanting to pass the CISSP certification.
- Anyone wanting to test their IT Security knowledge.
